

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (previously presented) A fluoropolymer-based composition comprising:

(a) a cationic dispersion comprising a fluoroacrylate copolymer with a glass transition temperature at ambient temperature;

(b) a cationic dispersion comprising a fluoroacrylate copolymer with a glass transition temperature of about 80°C to about 100°C;

(c) a nonionic hydrophilic polyester softener; and

(d) a water- and oil-repellent aid, comprising an emulsion of an inorganic salt.

2. (previously presented) The composition according to claim 1, wherein (a):(b) is greater than 50:50.

3. (previously presented) The composition according to claim 1, wherein (a):(b) is greater than 60:40.

4. (previously presented) The composition according to claim 1, wherein (a):(b) is greater than 70:30.

5. (previously presented) The composition according to claim 1,  
wherein (a):(b) is less than 85:15.

6. (previously presented) The composition according to claim 1,  
wherein (a):(b) is less than 80:20.

7. (original) The composition according to claim 1, wherein (a):(b) is  
about 75:25.

8. (previously presented) The composition according to claim 1,  
wherein (a) and (b) comprise greater than 5% of the composition by  
volume.

9. (previously presented) The composition according to claim 1,  
wherein (a) and (b) comprise greater than 10% of the composition by  
volume.

10. (previously presented) The composition according to claim 1,  
wherein (a) and (b) comprise less than 25% of the composition by  
volume.

11. (previously presented) The composition according to claim 1,  
wherein (a) and (b) comprise less than 20% of the composition by  
volume.

12. (original) The composition according to claim 1, wherein (a) and (b) comprise about 15% of the composition by volume.

13. (previously presented) The composition according to claim 1, comprising (c) in greater than 0.1% by volume.

14. (previously presented) The composition according to claim 1, comprising (c) in less than 5% by volume.

15. (previously presented) The composition according to claim 1, comprising (c) in less than 2.5% by volume.

16. (original) The composition according to claim 1, comprising (c) in about 1% by volume.

17. (previously presented) The composition according to claim 1, comprising (d) in greater than 0.1% by volume.

18. (previously presented) The composition according to claim 1, comprising (d) in less than 5% by volume.

19. (previously presented) The composition according to claim 1, comprising (d) in less than 2.5% by volume.

20. (original) The composition according to claim 1, comprising (d) in about 1% by volume.

21. (previously presented) The composition according to claim 1, comprising water in greater than 65% by volume.

22. (previously presented) The composition according to claim 1, comprising water in greater than 75% by volume.

23. (previously presented) The composition according to claim 1, comprising water in less than 90% by volume.

24. (original) The composition according to claim 1, comprising water in about 80-85% by volume.

25. (original) The composition according to claim 1, comprising (a):(b) in a ratio of about 75:25, wherein (a) and (b) comprise about 15% of the composition by volume;

about 1% (c) by volume;

about 1% (d) by volume; and

about 80-85% water by volume.

26. (previously presented) A method for applying an oil and/or water repellent composition comprising the steps of:

providing a substrate;

providing effective repellency enhancing amounts of an oil and/or water repellent composition according to any one of claims 1-25;  
applying said oil and/or water repellent composition to said substrate as a continuous stream from a hand-held air pressurized pump.

27. (previously presented) The method according to claim 26, wherein said substrate is a fabric substrate.

28. (previously presented) The method according to claim 26, wherein said substrate is a textile substrate.

29. (previously presented) The method according to claim 26, wherein said substrate is a wool carpet substrate.

30. (previously presented) The method according to claim 26, wherein said substrate is a paper substrate.

31. (previously presented) The method according to claim 26, wherein said substrate is a leather substrate.

32. (previously presented) The method according to claim 26, wherein said substrate is a natural flooring substrate.

33. (previously presented) The method according to claim 26, wherein said substrate is a wood substrate.

34. (previously presented) The method according to claim 26, wherein said substrate is a stone substrate.

35. (previously presented) The method according to claim 26, wherein said substrate is a wallpaper substrate.

36. (previously presented) The method according to claim 26, wherein said substrate is a tile substrate.

37. (cancelled).

38. (previously presented) A method for applying an oil and/or water repellent composition comprising the steps of:

providing a substrate;

providing effective repellency enhancing amounts of an oil and/or water repellent composition according to any one of claims 1-25;

applying said oil and/or water repellent composition to said substrate by means of a hand-held roller.

39. (cancelled).

40. (previously presented) A method for preparing a composition according to any one of claims 1-25 comprising the steps of combining:

- (a) a cationic dispersion comprising a fluoroacrylate copolymer with a glass transition temperature at ambient temperature;
- (b) a cationic dispersion comprising a fluoroacrylate copolymer with a glass transition temperature of about 80 to about 100°C;
- (c) a nonionic hydrophilic polyester softener; and
- (d) a water- and oil-repellent aid, comprising an emulsion of an inorganic salt.

41. (original) A composition prepared according to the method of claim 40.
